

Family Bible Records Transcribed in The Colorado Genealogist

Our current subject index online has very spare listings (surnames only) of the Bible transcriptions that have appeared in *The Colorado Genealogist*. This is an attempt to do a more complete indexing of the documents that have been transcribed in this publication. **This index is fully searchable.**

Many of the original records are held by the Denver Public Library. In addition to the manuscript collection held by the Denver Public Library, *The Colorado Genealogist*, especially in the early years, would seek out people with Bibles to transcribe and publish, and sometimes even “find” Bibles in used book stores or Goodwill or other odd places. These were then also transcribed for the quarterly. The transcriptions should tell you the origin of the item. The main family is listed for each, and some of the listings have subgroups of descendants or collateral families. If you think that an entry sounds possibly useful, look up the names in the Surname Index for that issue (available online at our web site) to see if any of the other names of interest appear. You can access the original of a particular manuscript by requesting it at the desk in the Western History/ Genealogy Reading Room on the first floor while there is remodeling. If you find a particular transcription done by CGS that you would like a copy of, please direct your request to the editor at quarterlyed@cogensoc.us, giving the information listed in this index. If you are a member, you can access the issues in Members Only.

It is the hope of this publication to continue to publish the files on hand and to continue to update this index. Many of these manuscript records that were transcribed are not necessarily from the state of Colorado. An additional column was added to the digital index indicating what states were mentioned in the records.

The first column lists the names of the primary couple, usually the oldest listing. Family surnames are capitalized. Wives' maiden names are in parentheses. Wives whose maiden names are unlisted in the transcription are indicated (--). The second column indicates from what type of records each was transcribed. The third column gives the information on publishing. The order for the numbering is volume:number of issue:page number(s).

Bible Transcriptions Published in The Colorado Genealogist
